SKYPADEL

TECHNICAL DATACARD

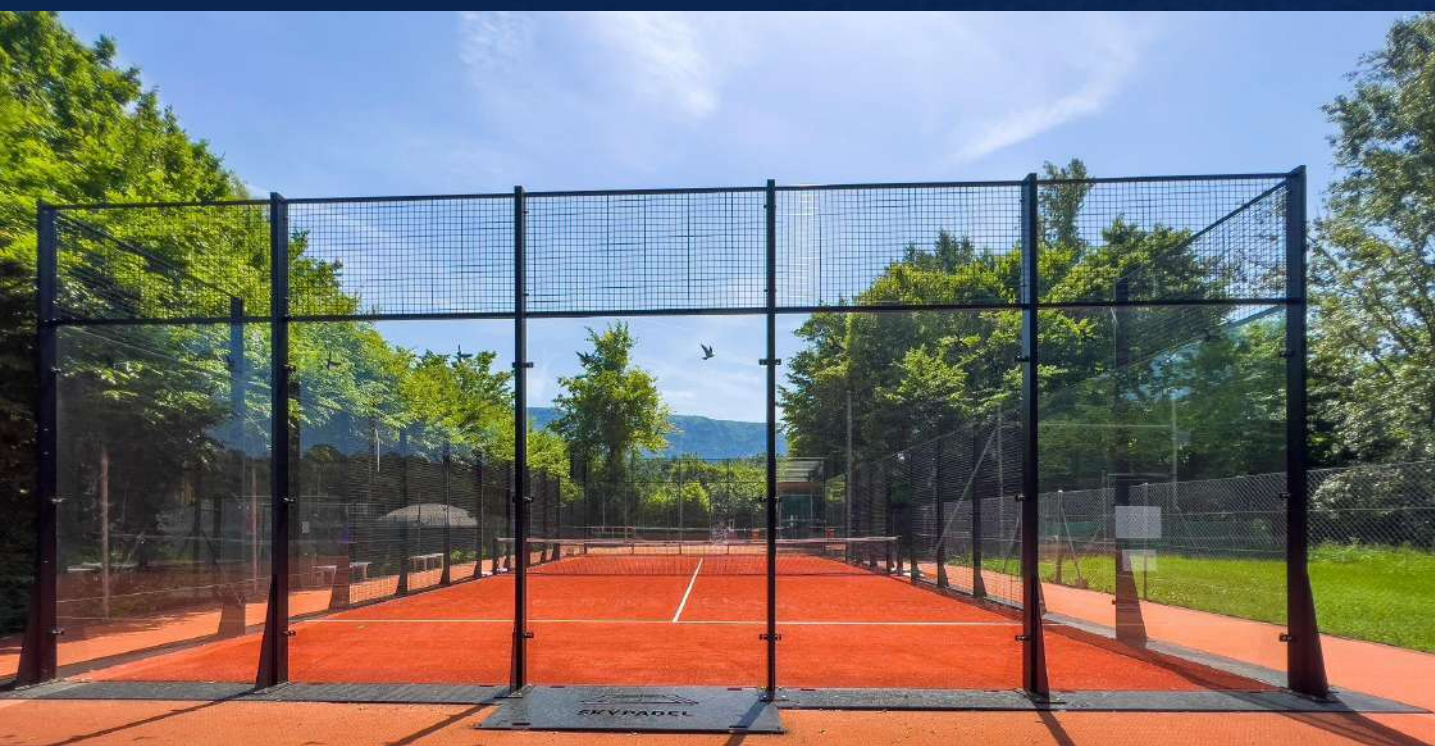

Portable Solution

All SkyPadel´s courts can be installed as a padel portable court thanks to the revolutionary PORTABLE SKY PADEL PORTABLE SYSTEM

Advantages of the Sky Padel portable solution

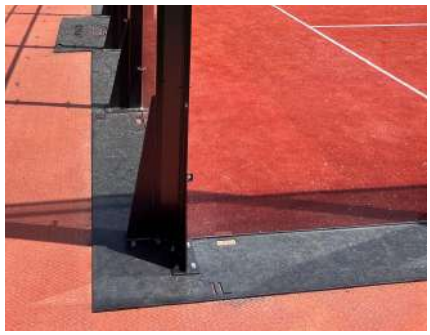

- Quick installation in less than 3 days
- No building permit required
- No need to invest in civil works
- Solid and durable structure offering wind resistance of up to 18 km/h
- Indoor and outdoor installation
- When installed outdoor, the entire perimeter metal crown is treated with a C5 anti-corrosion treatment.
-

Example of outdoor installation on a tennis court with resin floor (Geneva, 2021)

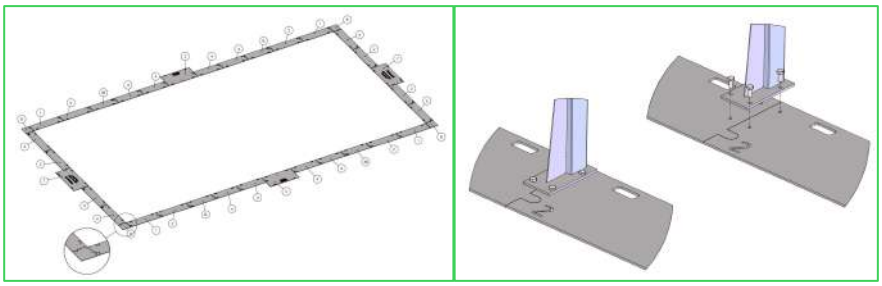

RING BEAM METALLIC STRUCTURE

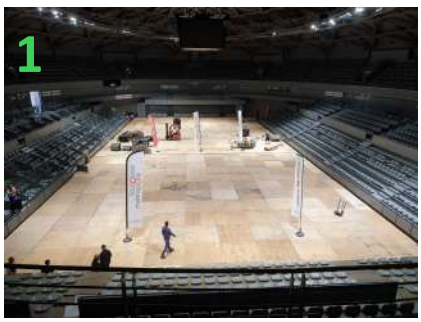

- The portable solution is made up of 2mx1m panels that fit together and rest on the ground.
- The pillars of the padel court are fixed with screws on each plate to form a very consistent ring beam metallic structure.
